Aviation Management College

Aviation Management College

Aviation Management College is set up with the main purpose to “add value” to the aviation fraternities in Malaysia . We want to become the central focus of aviation management related knowledge and information in Malaysia . We want to provide the growth impetus to the aviation industry in Malaysia . As you may be aware, the aviation industry is set to grow in the Asia and Pacific regions (including Malaysia) with the advent growth of China and India economies.

In keeping to our core values: Customers Satisfaction, Continuous Improvement, Professionalism and Teamwork, our students and participants’ satisfaction is our primary concern. Your educational and training well being is our central focus.

Our other goal is to produce graduates, not just with the knowledge, but with the skills to communicate and interact well with other people and hence attaining the problem-solving skills so much needed in the industry. As Thomas More said “Education is not piling on of learning, information, data, facts or abilities – that is training or instruction – but is rather making visible what is hidden as a seed”.

Currently, our core product is the Diploma In Aviation Management and Diploma In Flight Operation Management – the first of its kind in Malaysia , with the goal of producing graduates who would be able to increase Malaysia ‘s aviation industry to greater heights. Previously, most of the aviation industry recruitments were from the generalist graduates and they would take a few years before they could be fully productive as they need to learn about aviation knowledge while working. Our graduates would be able to undertake the job immediately as they would be exposed to all this knowledge while undergoing the diploma course at the College.

**Aviation Management College is
the FIRST AVIATION COLLEGE to
conduct aviation courses
IATA in Malaysia!**

Our programs are recognized
INTERNATIONALLY

MY-AMC-01-20-001

AMC is approved by
Government and IATA
recognized.
